DATA SCIENCE | MACHINE LEARNING

MOTIVATION *I am passionate about [solving business problems](#) using Data Science & Machine Learning. I creatively use my skillset to [add tangible value](#) to the team and the business. I am constantly learning, and practice continual improvement.*

SKILLS & TOOLS [Programming](#): Python (Base, Pandas, Numpy, Matplotlib, Scikit-Learn, Keras), SQL, R.
[Machine Learning](#): Linear Regression, Logistic Regression, Decision Trees, Random Forest, KNN, k-means, PCA, Association Rule Learning, Causal Impact Analysis
[Other](#): Statistics, Github, Data Visualization, MS Office, Tableau, Spyder, Jupyter Notebook.

EXPERIENCE **Module Lead - Elektrobit Automotive**
AUG 2018 – FEB 2020

- [Created metrics at organization level](#) which led to educating employees about the need and importance of data.
- [Created automated and interactive dashboards](#) to generate a dynamic weekly report that helped senior management understand and investigate trends over time, and diagnose potential issues.
- Trained up to 70% of new joiners and 20% of total employees in [Agile](#) methodologies.

Assistant Manager - Altran
APRIL 2015 - JUNE 2017

- [Built predictive models using Multiple Linear Regression and Logistic Regression](#) that estimated project team's Defect Leakage to customers with an average prediction performance(r-squared 92%). This led to reorganizing team structure and increase in code reviews and implementing code review tools.
- Analyzed several team's performances by conducting [AB Testing using Paired sample t-test](#). This led to gauging whether actions taken were effective or not.
- Created Organization and domain-specific [Performance Baselines using Outlier Analysis](#). This led to improvement in data tracking by 60% and analyze their performance against the baseline.
- [Coached 40% of teams on Agile transformation](#) which led to better collaboration among the stakeholders.

Software Quality Engineer - HCL Technologies
SEPTEMBER 2011 - APRIL 2015

- [Built several predictive models using Multiple Linear Regression](#) that estimated project team's productivity, overall cycle time and Defect Density with an average prediction performance(r-squared 85%). This led to improvement in team's planning and delivery by ~ 20%.
 - [Initiated data tracking and retrospectives](#) in a major Delivery Unit with a headcount of 800 which helped projects's delivery performance by 30%.
 - Conducted [Hypothesis Testing- AB Testing using Chi Square and t-tests](#) which led to proposing changes to team's structure and identify needs needed for improvement.
-

DATA SCIENCE | MACHINE LEARNING

PROJECTS

Find a shoe with an image

- Used Transfer Learning in Convolutional Neural Network to build a [Deep Learning based Image Search Engine](#) that will help customers find similar products to ones they want.

"You Are What You Eat" Customer Segmentation

- Used [k-means clustering](#) on grocery transaction data to split out customers into distinct "shopper types" that could be used to better understand customers over time, and to more accurately target customers with relevant content & promotions

Alcohol Product Relationships

- Used [Association Rule Learning](#) to analyze the transactional relationships and dependencies between products in the alcohol section of a grocery store.

EDUCATION

Master of Science (Business Analytics)

2020 - 2022 - California State University East Bay, California, USA

Bachelor of Engineering (Information Science)

2007 - 2011 - Visvesvaraya Technological University, Bengaluru, India

AWARDS AND CERTS

- [Hats-off Award](#) demonstrating an impeccable sense of responsibility and going beyond the call of duty.
- [Top 10 BSPIN Lean Agile Transformation Award](#) showcasing a case study in innovation and collaboration.
- [Honored in COO's recognition](#) to have successfully implemented prediction models that led to improvement in project's efficiency.
- [Certified Scrum Master](#) - enabled and coached teams for implementing Agile's best practices.
- [Certified Data Science Infinity Professional](#) - successfully implemented the projects using Machine Learning and Deep Learning algorithms in Python.
